

The last partnership meeting for the KA2 project: **"AI SMM - Piloting Artificial Intelligence for integration and prosperity through Social Media Marketing education"**, which took place in Athens, Greece from 18 to 21 September this year, marked the end of our two-year project journey. We started from Valencia (Spain), then via Syracuse (Italy) and Koge (Denmark), and mostly through various local activities, we worked on fulfilling the goal of the project: Piloting artificial intelligence for integration and prosperity through social media marketing education.

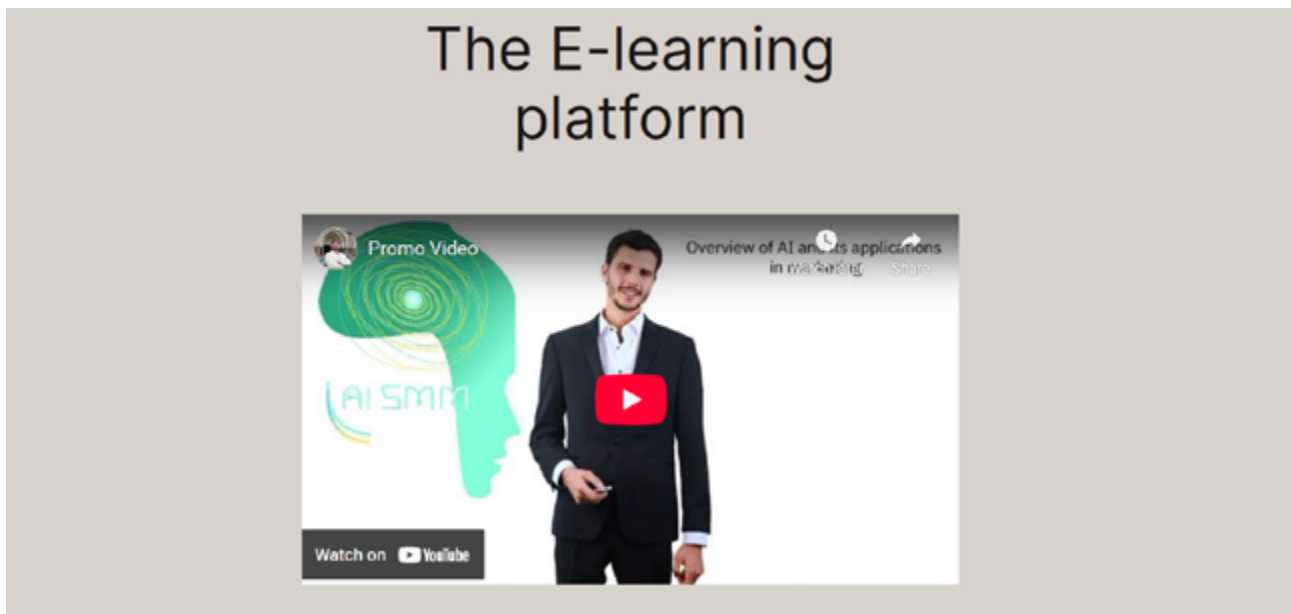

As a final product of the implemented project activities, the **"Adult Educators Guide for Digital Inclusion of Adults with Fewer Opportunities"** will remain, which you can download and read in English, Danish, Italian, Spanish, Macedonian and Dutch.

Also, during the project, we created the E-learning platform: world of limitless possibilities, where the journey is as exhilarating as the destination, and as we navigate the intricate tapestry of existence, we are constantly presented with choices, each a potential pathway to something extraordinary. This is a world where creativity knows no bounds, where the curious mind finds solace, and where the fearless heart discovers uncharted territories.

Thanks to everyone involved in the project, and we hope for a new collaboration soon.
